

**I N A R C H I**

# L I G H T S   O N

One tends to think of light as something constant, unchanged over time.

This is true in some sense of the word - but the way we create light around us is ever evolving, creating light sources that show new characteristics when compared to those commonly used.

LED is one of the harbingers of the future - a technology that has evolved immensely in the past decade, applied in more and more areas in everyday situations, delivering light with higher efficiency, in new spectrums.

Our creators have worked fanatically to develop our custom-made LEDs, which deliver superior performance, yet boast incredibly slim outlines, enabling us to apply them in confined spaces within the often sleek, graceful designs that were born in the minds of our designers.

We have devoted ourselves to update our approach to future technologies, and bring them into today's objects.

Beside our constant strive towards innovation, we respect and

believe in traditional forms, shapes and materials - delivering both intellectual appeal and emotional content.

Using materials tailor-made for us, we find ever-new sources to feed our imagination in the process of creation. We take great pride in the amount of care and attention that we put into these elements, designing technical solutions and discovering new applications.

Instinctive desire drives us to make spaces remarkable with our designs. While designing our items, we kept one core thought - every person wishes to leave their mark on the world, and shape the spaces that surround them. It is our duty as designers to complement lives, and give tools into the hands of creators to make their space complete.

What is the result? A beautiful duet of rationality and emotion. Objects that radiate both conceptuality and freedom.

We'll show you.

Lights on!

# A B O U T U S

There comes a time in life when one looks back, evaluates life, and becomes aware of the sum of experience that accumulated over the years. When this moment comes, new thoughts, new notions are born in one's mind - a sense of clarity and purpose rise from the plethora of experience.

This - the essence of empiric learning - is even more cathartic, when experience is shared between two visionaries, each with an individual perspective, yet looking in one direction.

Janos Héder and Judit Zoltai are well-known when it comes to designer lamps and installations - for good reason. They have not only been the designers of, but the driving force behind the success story of the decade, bringing chandeliers to life for projects all over the World, inspiring and uplifting the thousands of people who see them every day.

Now, we decided to realize a completely new aspect of our

dreams - creating a line of lighting elements that exist in pure, minimal state, to bring light to more spaces than ever before.

Every aspect of these elements brings another facet of the creators' imagination to the surface, who have embarked on this journey of self-exploration, touching new tools, new materials on their way toward their vision.

So, one could ask - what is the sum of all knowledge accumulated?

The challenging art of minimalism, where every millimetre is accounted for. The craftsmanship that cumulates into uncluttered designs, unprecedented aesthetic value, and profound functionality.

Simplicity. Beauty.

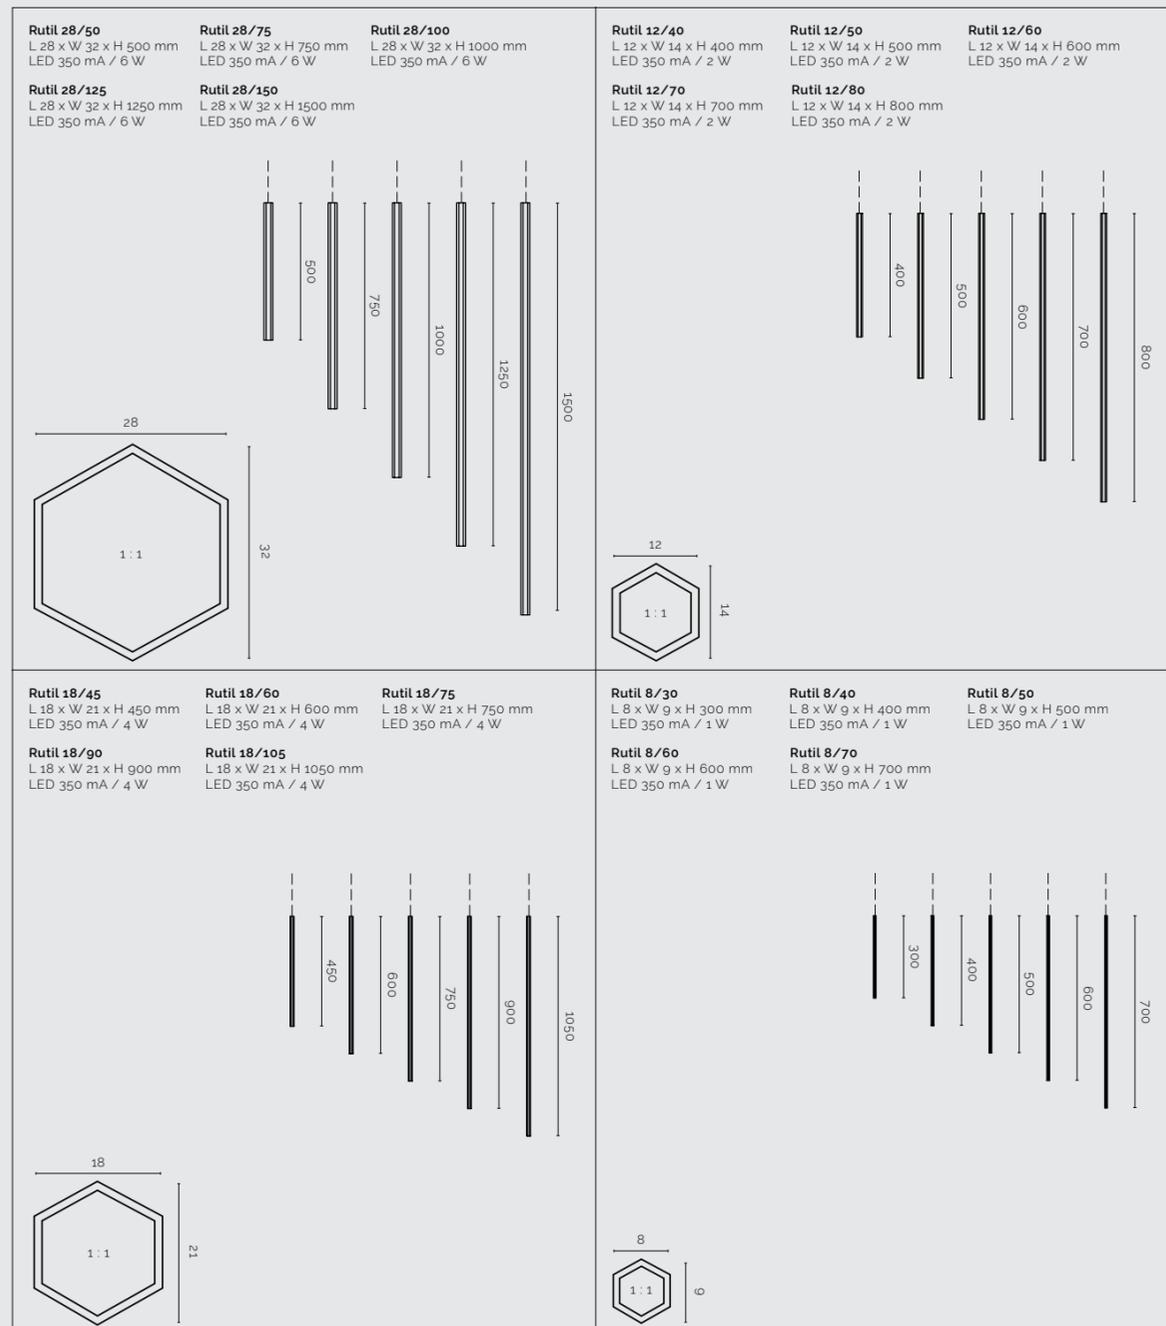

# RUTIL

---

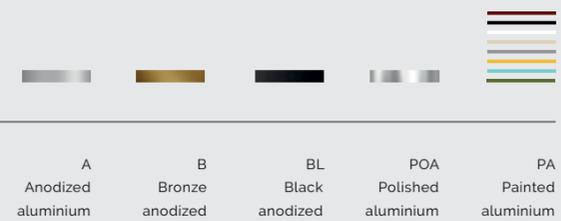

Delivering options ranging from ultra-slim form to thicker variants, this element is attractive both in singular or composition application, shining in different characters depending on the distance to the lit surface. Its various finishes feature polished or anodised aluminium in bronze, and various other colours. A distinct and defined element in any architectural space.

## RUTIL

Hexagonal aluminium suspended light with ultra-compact, high intensity LED light.

Anodized aluminium / Bronze anodized / Black anodized /  
Polished aluminium / Painted aluminium  
LED 350 mA / 3000 K — IP 20

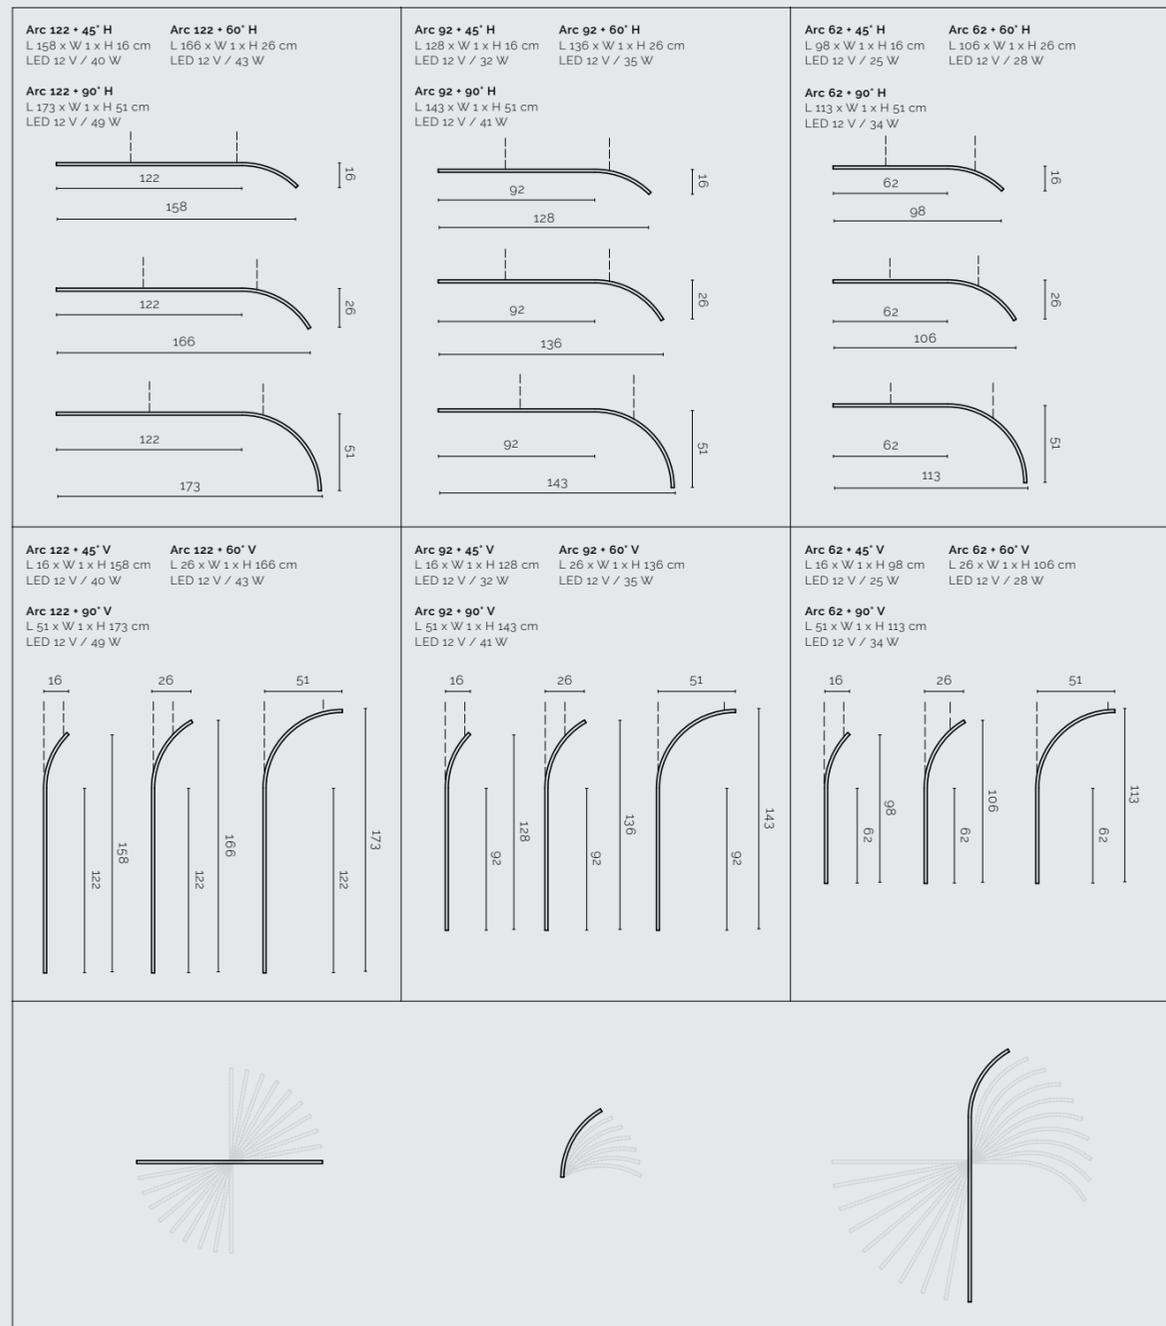

# A R C

---

This highly versatile array of curved and straight elements captures the essence of graceful movements, enabling the designer to compose their own highways of light into any space. Infinitely variable, it is an elegant solution for any person to shape the space they wish to define, grouping and directing these lines of light to find the exact shape their fantasy is looking for.

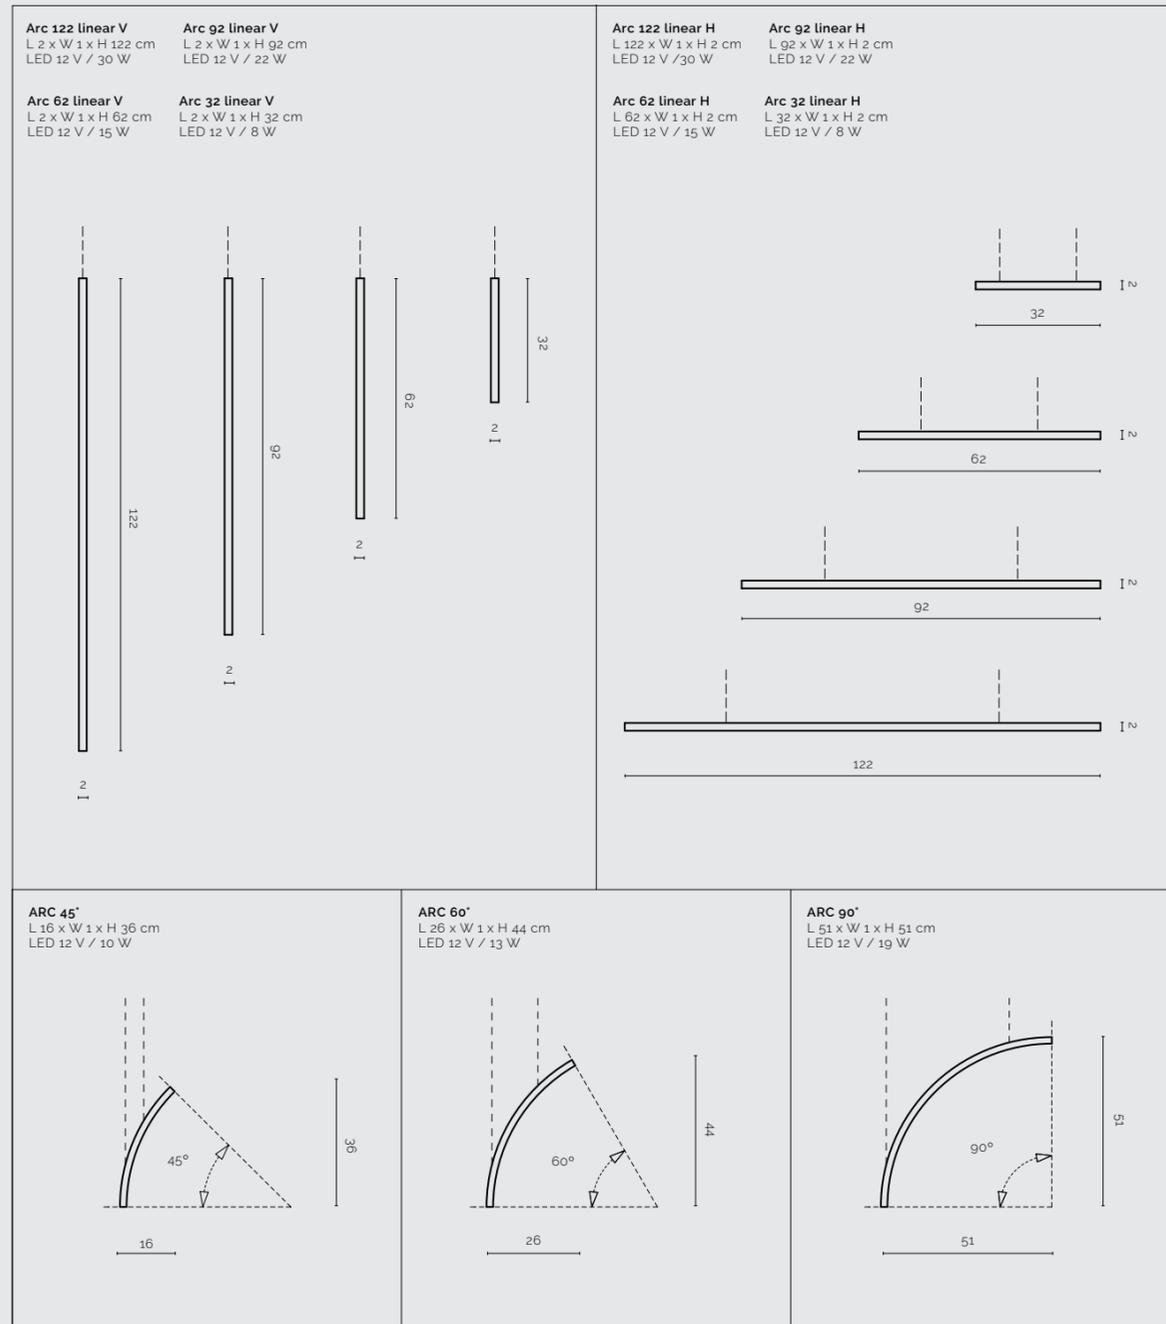

# ARC

Rectangular aluminium profile system with high-performance LED lights.

Anodized aluminium / Bronze anodized / Black anodized  
Acrylic diffuser  
LED 12 V / 3000 K — IP 20

# FRAME

---

An ideal element of any space that speaks a clear, minimalist architectural language. A suspension sculpture with a grasping outline and high-performance light sources, this impressive element places emphasis on the essential beauty of symmetry and contrast. Able to create and define spaces and planes, both ethereally light and distinct. Can be joined together due to the openness of the design, endlessly variable to create an infinite number of dimensions.

<p><b>Frame 124/22 H AL</b> L 124 x W 1 x H 22 cm LED 12 V / 30 W</p> 	<p><b>Frame 100/18 H GL</b> L 100 x W 1 x H 18 cm</p>

# HEXAN

---

Elegance and grandeur are the two words that instantly appear in a spectator's mind - this element is made both with a full-face bronze body, shining with the timeless warmth of this classic material, and a frame-only appearance, in glass and steel versions, showing a minimal, ethereal face towards the world. These two fundamentally different approaches show a beautiful system of counterpoints, being able to shape the space they inhabit through contrasting appearances.

<p><b>Hexan 37 bronze</b> L 37 x W 3 x H 32 cm LED 12 V / 4 W</p> 	<p><b>Hexan 37 glass</b> L 37 x W 3 x H 32 cm LED 12 V / 4 W</p> 	<p><b>Hexan 48 glass</b> L 48 x W 4 x H 42 cm LED 12 V / 6 W</p>

# SASSO

---

Created with elegance in mind, the smooth outline of this element makes it a beautiful, warm and welcoming complement to any space. The LED lights deliver a characteristic, indirect light, discreetly pointing out the mesmerising beauty of the unique patterns. The suspended variant is available both in carrara, which delivers a matte finish, and bronze amani, which is glossy in solitary application, and matte in composition. These familiar, friendly shapes create a feeling of welcomeness and serenity in any application.

## SASSO

Suspended luminaire or wall sconce made from marble with high-performance LED lights.
